

TAPING OF NASOGASTRIC TUBE (NGT)

Parent/Caregiver Information

Correct

Taping secure, tape right up to nostril

Incorrect

Taping insecure — tape too far from nostril allowing fingers to get in.

NGT might move during feed

Warming milk feeds

Feeds that have been refrigerated can be warmed for up to 15 minutes in a warm water bath. Ensure milk is in a leak proof container.

Only use water from taps in the clinical areas. The temperature of these taps cannot be adjusted.
